

BRADLEY REACH™

Hasbro Children's Hospital, in partnership with Bradley Hospital, is a national leader in providing integrated medical and psychiatric care.

OUR APPROACH:

We provide care for children and adolescents ages 6-18 who are experiencing physical and emotional challenges.

Our patients have:

- somatic symptoms disorders (eg, functional neurological disorder)
- co-occurring physical and psychiatric conditions (eg, diabetes and depression)
- restrictive eating disorders

OUR PROGRAMMING OFFERS:

A full continuum of care for patients specifically experiencing both physical and emotional challenges, including outpatient care, home-based services, partial hospitalization, and inpatient treatment.

An interdisciplinary clinical team at the partial and inpatient levels of care, providing integrated care for patients and their families.

A family-based perspective, centering on relationships and illness beliefs.

OUR CONTINUUM OF CARE:

The Judge Bruce M. and Cynthia M. Selya Integrated Care Unit (Selya 6), our 16-bed inpatient medical-psychiatric program, provides integrated care in a safe, secure environment.

Our Hasbro Partial Hospital Program (HPHP) provides milieu-based treatment five days per week for up to 24 patients at a time.

OUR CONSULTATION SERVICES:

We know that the need for this type of care is growing across the country. We want to share our expertise and make quality care accessible to more patients with combined physical and emotional challenges wherever they live.

Through our consultation services, we provide in-person and virtual expertise regarding:

- Clinical care
- Admissions criteria
- Program and unit design
- Programming
- Operations
- Policies

For more information, and to discuss how we can partner with you to support your facility, please contact bradleyreach@lifespan.org or call 401-432-1137.
